

# Health Profession and Social Care courses

---

---

\*To find out more about first-class teaching at Huddersfield, visit [hud.ac/why-huddersfield](http://hud.ac/why-huddersfield).

# Areas covered

---

- Overview of each course
- Placements
- Facilities
- Open days

# Midwifery Studies

- March and September intakes

# Nursing: Four fields

# Blended Learning Nursing

---

- Provides a flexible way to study using mainly digital technologies, and also includes practical and hands-on experience.
  - You'll attend the campus in Huddersfield for a maximum total of 20 days per year of the course.
  - You'll also undertake practice placements across the NHS and healthcare organisations in a setting close to home.
- 

# Occupational Therapy

Work with people of all ages to improve or maintain their health and wellbeing.

Help them overcome the effects of disability caused by physical or psychological illness, ageing or accident.

# Operating Department Practice

Operating Department Practitioners (ODP's) work alongside surgeons, anaesthetists and theatre nurses to care for patients during surgery.

# Optometry

---

- Combine scientific principles in Optometry and vision sciences with practical clinical skills from the first year.
- **The UK regulator for Optometry, the General Optical Council (GOC) has published revised standards for all optometry providers in the UK. The current BSc(Hons) course is being adapted and will be replaced by a 4 year integrated Masters course in 2024.**

# Paramedic Science

Well-known for working within Ambulance Services providing immediate and emergency care in response to 999 calls made by the public. Paramedics now also work in other areas of healthcare, including GP practices, hospital emergency departments and police custody suites.

- You'll combine studying science theory with developing practical and professional skills, whilst focusing on medicines and patients.
  - As you progress, you'll have the chance to work in our formulation lab, where medicines are made, and get to grips with aspects of the profession, from prescriptions and patients, the development and design of drugs and the role of pharmacists in society.
- 

# Physiotherapy

Helps restore movement and function.

Assess, advise and treat people with a variety of conditions.

# Podiatry

Podiatrists aim to improve the mobility, independence and quality of life of their patients.

Responsible for the care of the lower limb and foot.

# Speech and Language Therapy

Speech and Language Therapists work with individuals of all ages and across the lifespan to facilitate and enable their speech, language, communication, feeding and/or swallowing difficulties.

# Health and Social Care

- Health and Social Care BSc(Hons)
- Health and Social Care MSci

You'll explore:

- Different aspects of health and social care
- How to assess needs
- Law, social policy, assessment and care planning.

# Social Work

Msci Professional qualifying course

Combines undergraduate and  
postgraduate study

Part of the Yorkshire Urban and  
Rural Teaching Partnership

# Placements

---

- Compulsory on all health professional and social care courses

## Health professional courses

- Blocks of placements each year in a range of different settings/organisations/trusts
  - NHS trusts, and many other health and social care providers, charities, schools and community groups.
- 

# Placements continued

---

## **Health and Social Care BSc(Hons) and MSci**

Complete a compulsory 160 hour work placement in your third year

## **Social Work MSci**

Undertake a compulsory 70 day work placement in year 3 and a compulsory 100 day work placement in year 4.

# Facilities

Provide the opportunity to practice essential skills before you go out on placement and are treating real patients

State-of-the-art facilities include:

# New facilities: Daphne Steele Building

- In late 2024 the new Daphne Steele Building will open on the site of the National Health Innovation campus.
- It will feature specialist clinical teaching facilities, world leading research facilities, public facing clinics and co-located public and private sector partners. It will directly impact on the health outcomes of the people and communities across the North of England

# Public facing Services

Artists impression of the atrium

- Our established Podiatry clinic, relocated into modern facilities
- Locala operating clinics providing community services that could include wound care or sexual health
- A gait clinic on the ground floor and potential for rehabilitation clinics using our physio plinth labs
- Health and Wellbeing Academy – including Get Set Goal student-led clinics
- A large cafe open to staff, students and the public

# Specialist Teaching Facilities

Artist's impression of the view from the ring road

- An immersive simulation room; a community house to replicate home care scenarios; a replica ambulance
- A replica operating theatre including anaesthetics and recovery rooms.
- Multiple simulation rooms for Paediatrics, Midwifery and Nursing to be taught and practised in a safe environment.
- Gait analysis space, physio labs, manual handling classroom and a sensory classroom.
