Academy of Live Technology

WHO WE ARE

We are a specialist institution offering higher education degrees and training for the next generation of live experience and entertainment talent.

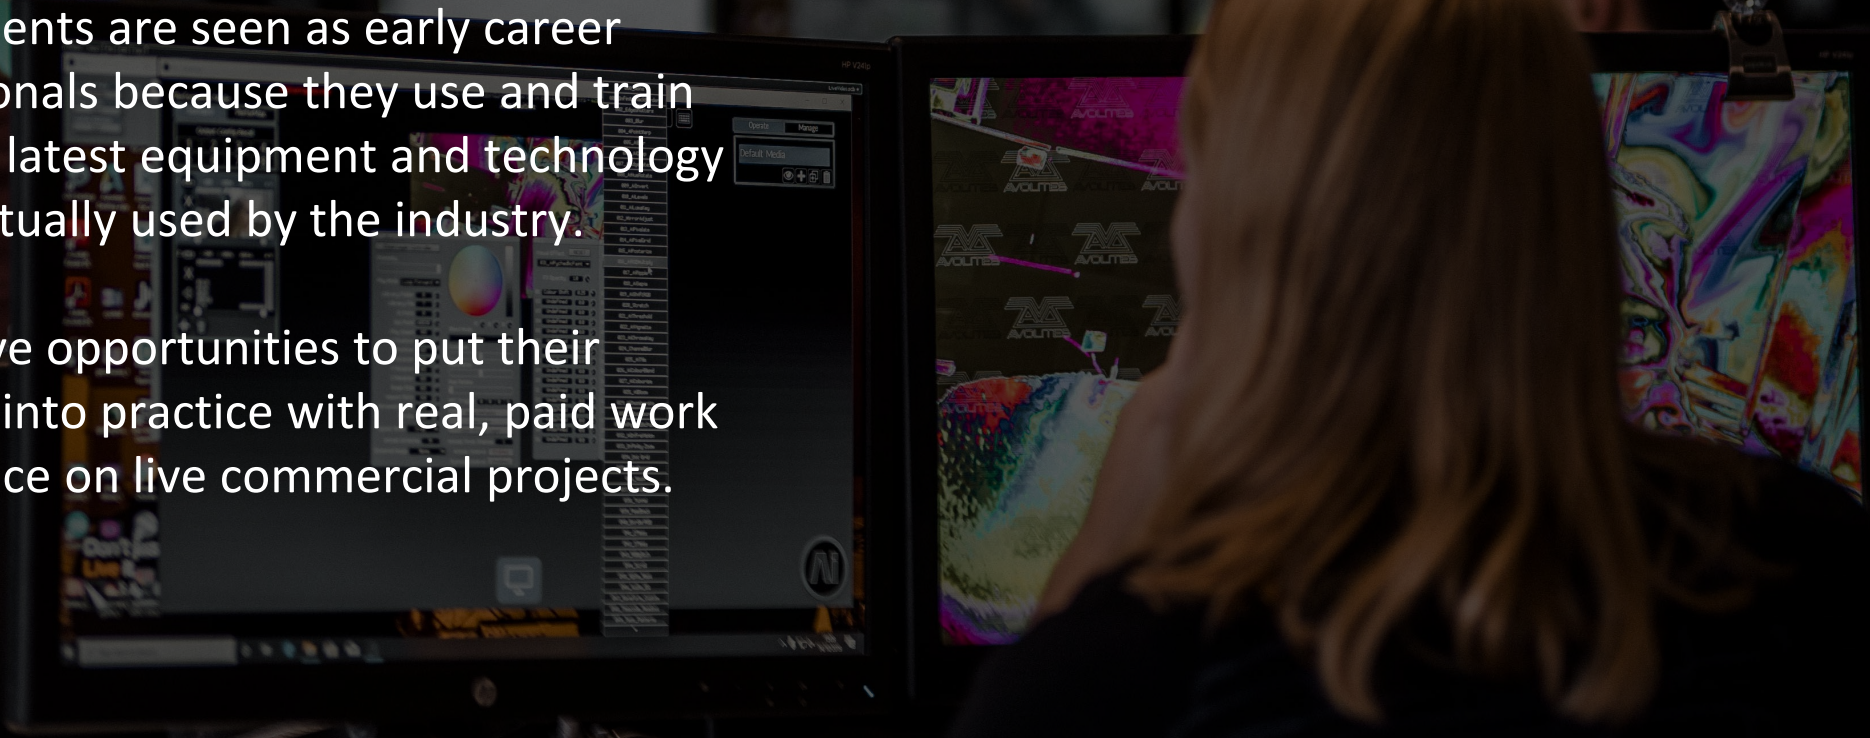

Academy of Live Technology

EARLY CAREER PROFESSIONALS.

Our students are seen as early career professionals because they use and train with the latest equipment and technology that's actually used by the industry.

They have opportunities to put their learning into practice with real, paid work experience on live commercial projects.

Academy of Live Technology

OUR CAMPUS

We're uniquely based at Production Park – a live experience campus in the north of England dedicated to creating and rehearsing international tours, films and TV productions.

Academy of Live Technology

Academy of Live Technology

OUR COURSES

Our degrees (and training courses) are designed to meet the biggest challenges and opportunities facing the live experience and creative industries today.

We teach what the industry wants and needs, we know this because we *ARE* the industry.

Academy of Live Technology

OUR DEGREES:

BA (Hons) Live Events Production.

BA (Hons) Stage and Production Management.

BA (Hons) Live Visual Design and Production.

LIVE VISUAL DESIGN & PRODUCTION

BA (Hons) Live Visual Design and Production is a ground-breaking degree focused on creating cutting-edge visual experiences for global audiences.

Core Topics:

- Projection Mapping
- LED Display Technology
- Custom Content 2D and 3D; Including world building.
- Interactive Workflows.
- Generative Content – “Realtime”.
- Media server programming and sequencing.
- Technical and Creative Design.

LIVE VISUAL DESIGN & PRODUCTION

BA (Hons) Live Visual Design and Production is perfect for a wide range of learners, such as those interested in:

- Gamers and Game Engine tinkerers!
- 2D and 3D art (analogue and digital) – all types.
- Programming.
- Mixed Media.
- VR/AR/XR technologies.
- TV, Film and Photography.
- Fine Art.
- Vjing – Visual DJs
- Stage Design/Product Development.
- Sound Design and/or composition. Also: DJ's and those with Audio Visual (AV) interest.
- Interactive Media.
- Website Coding/development.
- General IT and computer interests.
- Previsualization and conceptual art.

Note: Many of the above overlap, which is fine!

The industry NEEDS you... THEM!

Even before Covid, our industry needed more industry professionals, particularly in visuals.

My students are highly prized and often have high paid jobs before they graduate.

Salaries and day rates are high across the board!

Students can travel the world, if they choose, or do a 9-5. It's very open.

Transferable skills are massive.

I have tons of success stories and a small (but growing!) army of graduates out there doing amazing things, but I need more students.

***THANK
YOU***
